Caledonian Society Celebrate Robbie Burns' 171st. Birthday

Mr. R. Ure, M.A., L.L.D. Gave "The Immortal Memory"

The annual Burns' Night banquet and dance for the Crossfield, Aldrie and Carstairs district was held in the Crossfield Masonic Hall last Friday evening.

Mr. A. H. Miller presided at the banquet. The Vice-President, Mr. Wm. Russell, in full Highland dress, piped in the haggis which was borne by Mr. John Chalmers, who was also attired in Highland costume. The address to the haggis was given by Mr. Adam Cruickshank the President of the Society, and the ancient Scots grace pronounced by the Rev. J. T. Adams Cooper the Secretary. After the dinner, which was truly a Scottish one, provided by Mrs. Adam Cruickshank, assisted by Mrs. A. H. Miller, Mrs. T. Green and Miss Alice Duthie, the first toast was to the King. Then came the "Immortal Memory" given very ably by Mr. Robert Ure, M.A., L.L.D. He spoke of the great influence which Robt. Burns had in connection with the freedom of the slaves in the British Empire and the United States. Mr. Ure also spoke of the great influence for good from the heart appeals of Burns' to his readers. There are many reforms due to the great power the poet put in his poems and songs.

The toast to Bonnie Jean was given by Mr. John Munro. Songs were rendered by Miss Carissie Robertson: Mr. and Mrs. T. M. Goldie, and Mr. John Munro. The accompanist was Mr. John Ure.

The tartan used at the banquet was that of the Clan Robertson in honor of the pioneer Scotsman of the district.

At the dance which followed, all the old Scots favorites were given, including Flowers of Edinburgh, Pas de Quatre, Circassian Circle and many others, some were accompanied on the pipes by Mr. Wm. Russell and Mr. Duncan Cameron. The pianist was Mr. Bennie and the fiddler Mr. Roy.

Now we are looking forward to a real Caledonian Sports Day and Picnic during the summer.

At The Banquet

It was a grand night for God's own chosen people.

Over 150 Scots along with their friends attended the banquet and dance.

The minister gave the auld Scots grace 'O Lord preserve us a' oor days Plenty o' meat and plenty o' claes. A haggis and a horn spoon. Another tattle when the lither's done.

Ilka body wore a wee bit o' the Robertson tartan in memory of Jamie Robertson, the pioneer Scotsman in the Crossfield district.

Mr. John Munro, Mrs. Woods, Mr. and Mrs. Archie Boyce, Mr. and Mrs. Hutchinson, Mr. Wm. Innis, Mr. and Mrs. John Ure, Mr. and Mrs. Goldie and family were among those from Carstairs and district who attended the Burns Night banquet and dance here on Friday night.

Annual Village Meeting Monday, February 3rd.

A Meeting of the electors of Village of Crossfield will be held at the Fire Hall at 7 o'clock p.m. on Monday, February 3rd, for the discussion of the affairs of the village; and that from 8 o'clock p.m. to 9 o'clock p.m. on the same day and at the same place, nominations for the office of councillor will be received.

One councillor is to be elected for a three-year term.

Board of Trade Re-Organized

Wm. Laut Elected President at Well Attended Meeting

The Crossfield and District Board of Trade took on a new lease of life on Wednesday evening when a re-organization meeting was held in the Fire Hall. About 25 of the business men of the town were gathered together and they all seemed in favor of re-organizing the Board of Trade.

It was explained that now was an opportune time to have an active Board, as there were many ways in which it could help the town and district.

Officers for three months were elected as follows:

President, Wm. Laut
Vice-President, T. Tredaway
Sec.-Treas., H. K. Fitzpatrick
Membership Committee—J. M. Williams, T. G. Sefton, T. Mossop, Adam Cruickshank, W. K. Gibson; and W. Miller.

It was decided to hold a meeting and luncheon within the next ten days, when several prominent members of the Calgary Board of Trade will address the meeting. It was thought that with the assistance of the members from Calgary, a better understanding could be arrived at as to the best way in which the local Board of Trade could carry out its work.

The membership fee was set at one dollar a year.

The membership committee will start immediately with an active drive for members.

Let's all get behind the Board of Trade. "Team-work"—that's what counts.

Crossfield I. O. O. F.

Installation of Officer

The officers of the Crossfield and Disbury Oddfellows Lodges were installed by District Deputy Grand Master W. G. Anderson from Calgary, in the Oddfellows' Hall on Wednesday night.

The following officers of the Crossfield Lodge, No. 42 were installed:

J.P.G., S. M. Reid
N.G., C. Richardson
V.G., J. Reeves
Rec.-Sec'y, Geo. McLeod
Fin.-Sec'y, J. L. McRory
Treas., Wm. Pogue

"SALADA" TEA

'Fresh from the gardens'

Forward, Canada!

Lying latent in the nature of almost every individual there is one human characteristic which comes to full bloom in times of excitement, emergency, or undue stress. It is the tendency to indulge in exaggeration. A crowd assembles for some particular reason and the average person estimates the number at two or three times its actual size, or an accident occurs and the report is immediately circulated that the toll of the dead and injured is many times greater than the reality.

So, too, when times are good the impression becomes general that they are better than is really the case, and a "boom" is created, speculation is indulged in far beyond what the circumstances warrant, and the end is ultimate loss, and in some cases disaster. Here in the West indications in any year may point to a fairly large and satisfactory crop yield, and the inevitable tendency is to make estimates of the yield far in excess of what the harvest reveals.

Turning to the other side of the picture, and the same thing will be found to be true. A slump occurs in business, the returns of the crop season are below the average, a degree of unemployment exists, and almost immediately the human tendency to exaggerate comes into play, and everything is painted in much more somber colors than there is any justification for so doing.

This tendency to undue exaggeration is in evidence in Western Canada today to the detriment of the whole country, and to every person resident therein. Recognizing the fact that the crop of 1929 was disappointing and below the average of many years, coupled with the further fact that the burden of the loss has to be borne by certain sections of the country which harvested little or no grain, the impression is created of a practically total crop failure, and that the country is in no good. Such exaggeration ignores the splendid returns of former years, and takes no cognizance of the fact that, taken on the whole, and year after year, Western Canada has been forging steadily ahead. One swallow does not make a summer, nor does one crop shortage, or even failure, condemn a country or provide substantial ground for discouragement and depression, any more than one bumper crop establishes the fertility of any section or justifies a "boom" and extravagant expenditure.

At this time the people of Western Canada, in city and country alike, may well give consideration to, and base their actions upon, the average of conditions. If the grain crop was smaller than usual in 1929, in 1928 it was so big that it shattered all records; if the 1929 grain crop fell below the average, dairy production, in Saskatchewan, for example, increased by three and one half million pounds, a 30 per cent. increase over 1928. The figures of building construction in the West, last year, established new high records; employment was maintained at a high ratio throughout the first nine months of the year, and the present slump is only seasonal and temporary, with prospects for 1930 just as bright as they were in 1929.

Let us remember that if the export of agricultural products by Canada fell off in the last half of 1929, the grain is still in Canada to be transported by our railways and sold by our people, and the results will be reflected in the business activity of 1930. Let us be encouraged by the fact that the greatest of our great Western enterprises, the Wheat Pool, has successfully contended with a set of the most difficult circumstances that have been put to the test, but with the united support of all Canada's banking institutions and business and commercial interests generally, it is now quite evident that it is winning out in its great fight to protect the interests of Canada's great army of producers.

It is impossible in this world for any person, country, or corporation, to forever move forward, onward and upward. It is inevitable that periods of recession must interrupt such steady progress. The stock market cannot forever go on climbing higher and higher; it must take a drop some time. If the pendulum swings too far one way, it must swing back again because an equilibrium must be maintained. We cannot always live on the rarified heights; it becomes necessary at times to descend into the quiet and repose of the valleys.

The position of Canada, and of all Canadian industry, agricultural, manufacturing, commercial, is essentially sound and strong; stronger than that of almost any other country in the world. There is no justification for any depression, because no cause exists for it. To the extent that it is prevalent with some people it is largely a mental error. Reverses have been suffered by some people in Canada as in other lands, and occasions arise in the life of every one when they meet with a reverse. But a reverse is not defeat. Courageously faced it can be turned to victory.

Putting Radio To Test

Soviet Radio Station Covers with Byrd's South Polar Party

Over 12,420 miles of sea and land—the northernmost and southernmost outposts of civilization—converted recently by radio.

The Soviet radio station, in Franz Joseph Land, compared weather with Rear-Admiral Richard E. Byrd's south polar party.

The Soviets described an Arctic dawn, and the Americans replied with a description of an Antarctic nightfall.

Byrd asked the Russians concerning progress of the search for Capt. Carl Ben Eielson, American aviator-explorer, lost in the Alaskan Arctic since Nov. 9.

A fly no bigger than a bee has been recorded to 815 miles per hour.

Heavy Charge On Industry

Fires Are Costing Canada Almost One Hundred Million Annually

Fire cost Canada, approximately \$100,000,000 yearly, according to a statement issued by the Canadian Chamber of Commerce in an effort to introduce to chambers and boards throughout the country a composition designed to lower this heavy charge on industry.

Business bodies have been classified into four sections determined by population, and a shift will be made for the organization showing the greatest reduction in fire loss, the most educational activity, along fire prevention lines, and the most permanent structural and protective improvements.

Origin Of Old Superstition

According to a writer in the London "Sunday Times," the superstition that it is unlucky to open an umbrella in the house has its origin in Catholic times, when the priest carried the victim to the dying person under a small canopy in the form of an umbrella, as is still done in Catholic countries today. Therefore the open umbrella in the house became associated with the idea of a death.

Vacuum-Cleaners-Are Valuable In Mining

Big Aid In Removing Coal Dust and Collecting It For Fuel

Can you imagine a vacuum-cleaner being any use in a mine? Housewives may scoff at the idea, but mining experts don't. They have discovered that vacuum-cleaners are a big aid in removing the coal-dust which settles everywhere in a mine, and collecting it for use as fuel. Coal-dust is frequently the cause of very serious explosions in mines, and it has been proved that even in quantities so small as one-fifth of an ounce to each cubic foot of space, it may produce an explosion. And the effects of an explosion of this kind are far-reaching—they are often at their worst 500 to 800 feet from the place where the trouble started. Various methods have been tried to prevent coal-dust explosions, one of the most widely used being spreading stone dust and sand on the floors of workings.

THIN-BLOODED PEOPLE ALWAYS FEEL COLD

To Withstand the Rigors Of Winter the Blood Must Be Rich and Pure

Thin-blooded people easily become discouraged. They lose strength; grip, influenza and ordinary winter colds seize them and they find it exceedingly hard to shake off any of these troubles. They feel chilly all the time; their nervous system becomes a wreck; they cannot sleep and life becomes a burden.

To overcome this deplorable state of health good blood is essential. Good blood gives warmth to the body; strength to the nerves and does much to allay prevent colds and winter troubles. They feel chilly all the time; their nervous system becomes a wreck; they cannot sleep and life becomes a burden.

Dr. Williams' Pink Pills do one thing but they do it well—they build up and renew rich, red health-giving blood thus making weak, run down men and women strong, active and happy. These Pills are sold by medicine dealers or by mail at a cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

California Lambs Eat Raisins

At the University of California there have been held some lamb fattening tests carried out with raisins and other feeders. They show that lambs readily absorb a rational pulp of very reject raisins or raisin pulp with other diet, and that the feed is very nearly as fattening as whole barley and lucerne hay mixed.

Persian Balm—the one toilet requisite for the dainty woman. Delightful to use. Leaves no stickiness. Swiftly absorbed by the tissues. Delicately fragrant. Imparts a velvety softness to the complexion. Tones up the skin, soothes and banishes all unpleasant roughness or chafing caused by wind and other weather conditions. Makes hands soft and white. Creates an elusive, essentially feminine charm. Persian Balm is indispensable to women of refinement.

Years ago good sleighing for Christmas week meant good business for the merchants. Nowadays if the cars can't run, the merchant is out of luck.

Optimist: "Cheer up, old man. Things aren't as bad as they seem to be."

Pessimist: "No, but they seem to be."

Smothering Spells Couldn't Walk Far Gasped For Breath

Mrs. T. W. Roth, Kelowna, B.C., writes: "For over a year I was troubled with smothering spells, and it was impossible for me to walk, even a short distance, on account of having to gasp for breath."

"A friend told me to try MILBURN'S HEART NERVE PILLS which I did, and in a short time I felt much better."

"I can now recommend them to everyone."

Price, 50c. a box at all druggists and dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

REMEMBER YOUR OWN CHILDHOOD

SCOTT'S EMULSION

Air Must Be Charted

Pilots Should Know Exact Location Of High Mountain Peaks

Tragic was the fate of the two British airmen who crashed into the side of a mountain in Northern Africa, and were killed, while attempting to make a non-stop flight from England to Capetown. It is a reminder that mountains are a greater danger to airmen than rocks are to seamen.

The seas have been so travelled that almost every rock in existence is known, charted, and in some way marked by signs at night. Except for what earthquakes may do by changing the configuration of the bed of the ocean, there is probably no voyage that any ship can make without being fully prepared to avoid submerged rocks.

The air routes will have to be marked out in the same way. This is not the first time that aviators have come to grief through hitting a mountain.

The route to South Africa is across varied terrain. These airmen may have been flying thousands of feet high and felt they were quite safe, forgetful of the peaks which rear their heads far above the clouds.

Long distance passenger planes are to increase rapidly, and the pilots will have to be provided with charts which will show them how high they must fly along the routes in order to avoid hitting a mountain.

Record Of Flying Clubs

Canada's Airmen Had 15,400 Flying Hours Last Year

Members of Canada's 23 light aeroplane clubs flew 15,400 hours during 1929, figures released by the civil aviation branch of the Department of National Defence show. This flying time is equivalent to 1,232,000 miles, and is nearly twice that flown in 1922. Total membership of the clubs is 5,092. At the end of the year there were 396 solo fliers, while 165 private pilots and 58 commercial pilots had graduated from the student ranks of the clubs.

In all infantile complaints that are the result of the deprivations of indigestion, flatulence and intestinal worms, the Worm Powders will be found an effective remedy. They attack the cause of these troubles, and by expelling the worms from the organs insure an orderly working of the system, without which the child cannot maintain its strength or thrive. These powders mean health and improvement.

Recipes For This Week

(By Betty Barclay)

SALMON CHATELREUSE

2 tablespoons gelatine.
¼ cup cold water.
1 tablespoon chopped carrot.
1 tablespoon chopped onion.
1 bay leaf.
2 tablespoons chopped celery.
2 cups water.
Juice 1 lemon.
½ teaspoon salt.
Few grains cayenne.
Boiled or canned salmon.
Lettuce; lemon slices.
Mayonnaise.

Soften gelatine in ¼ cup cold water. Bring carrot, onion, bay leaf and celery to the boiling point in 2 cups water and boil 4 minutes. Add softened gelatine, strain, add lemon juice, salt and cayenne. Put a layer of jelly in bottom of a mold that has been dipped in cold water. When firm cover with salmon and pour over remaining portion of gelatine mixture. When stiffened unmold on bed of lettuce, garnish with lemon slices and serve with mayonnaise.

APRICOT WHIP DESSERT

1 package lemon junket.
1 pint milk.
¼ cup stewed apricots.
4 teaspoons sugar.
2 egg whites.
Make junket according to directions on package. Beat the egg whites until stiff, add the apricots, which have been put through a sieve, and mix thoroughly. Pile on top of junket when ready to serve.

The area of the world which boasts the least illiteracy is western Europe. Minard's—The Great White Liniment.

Use Ancient Method To Heat Cathedral

System Used In Roman Baths Duplicated In Great Liverpool Edition

A system of heating similar to that used by the Romans in their sumptuous bath houses has been adopted for use in Liverpool cathedral, which, when completed will be one of the largest and most magnificent in the world, remarks Mr. Barry Watson, B.A., sc. writing on "Heating the House," in the latest issue of Canadian Homes and Gardens.

"One of the earliest means used for the distribution of heat to points remote from its source, was that invented by the ancient Romans for many of their bath houses," he says: "This was the distribution of hot gases from the fire through underfloor ducts in the building, and it is a significant fact that this same system has just been installed in Liverpool cathedral with the difference that clean air heated by steam coils, instead of smoke and hot gases from the fire, passes beneath the stone flooring. In such a system the air of the building is heated by contact with the warm flooring, and upon expanding, due to heat it becomes lighter than the cooler air above and, therefore, floats gently toward the top of the building, while the heavier cool air falls to the floor, to be heated in its turn."

"This movement of the air is a simple example of gravity circulation, which is the principle upon which nearly all residential heating systems operate."

Help For Asthma. Neglect gives asthma a great advantage. The trouble, once it has secured a foothold, fastens its grip on the bronchial passage tenaciously. Dr. J. D. Kellogg's Asthma Remedy is daily benefiting cases of asthma of long standing. Years of suffering, however, might have been prevented had the remedy been used when the trouble was in its first stages. Do not neglect asthma, but use this preparation at once.

Award For B.C. Astronomer

Gold Medal Won By Director Of Dominion Observatory, At Victoria

The gold medal of the Royal Astronomical Society has been awarded to Dr. J. S. Plaskett, director of the Dominion Astro-Physical Observatory, at Victoria, B.C., it has been announced. Dr. Plaskett earned this high award for valuable observations of stellar radial velocities and important conclusions derived from these observations. The Victoria scientist has accepted the Society's invitation to hold the post of George Darwin, Lecturer for 1930, in England.

The formation of large hailstones begins at heights estimated at between 15,000 and 40,000 feet above the ground.

The river systems of the earth are estimated to carry to the ocean each year about 4,500 cubic miles of water.

The lowest point for thousands of miles of the Andes is 10,000 feet above the sea.

Your Child's Cold Needs Double Treatment

CHILDREN hate to be "dosed." When rubbed on, Vicks relieves colds 2 ways at once without "dosing": (1) Its healing vapors, released by the body heat, are inhaled direct to the air passages; (2) "It draws out" the soreness like an old-fashioned poultice.

VICKS VAPOR
OVER 15 MILLION JARS USED YEARLY

American Farmers Protest

Enter Claim Against British Columbia Smelting Company For

A meeting of the international joint commission is to be held at Washington, D.C., when the case of the claims entered by the farmers of the state of Washington against the Consolidated Mining and Smelting Co., of Trail, B.C., will be heard.

Those farmers claim that the sulphur dioxide fumes from the smelter have done great damage to their crops, have destroyed the fertility of the soil and, as a consequence, have caused financial loss to them. The case was heard in the state of Washington last year, when a thorough investigation was conducted on the spot by the international joint commission.

The smelters company have since proceeded to construct a plant which, by the Cottrell process, will extract the injurious elements from the fumes and which will turn them into fertilizer. The success of this effort, which will cost several million dollars, depends upon the market offering for such fertilizer in the prairie provinces.

Evidence taken before the commission last year showed that while some damage had been done by the fumes, this was scarcely so considerable as claimed. Smelters had been cognizant of the matter for several years and in its own immediate neighborhood in British Columbia, had settled it by purchasing the surrounding land to a wide radius. This method of adjustment is impossible in the United States, however, since the state of Washington has a strict law which prohibits aliens from owning property in that state.

Marie: Is it true that Margaret has a secret sorrow?

Anna: Why, yes; hasn't she told you of it?

Mahogany trees do not reach their full height until they are 200 years old.

Needless Pain!

People are often too impatient with pain. Suffering when there is no need to suffer. Shopping with a head that throbs. Working with a back that aches. And Aspirin would bring them immediate relief!

The best time to take Aspirin is the very moment you first feel the pain. Why postpone relief until the pain has reached its height? Why hesitate to take anything so harmless?

Read the proven directions for checking cold, easing a sore throat; relieving headaches and the pains of neuritis, neuralgia, rheumatism, etc.

You can always count on its quick comfort. But if pain is of frequent recurrence see a doctor as to its cause.

TRADE MARK REG.

New Nipawin Bridge Will Provide Gateway To Rich Area In Northern Saskatchewan

Faith in Canada's northern areas of resource becomes reality in the Canadian Pacific bridge now nearing completion at Nipawin, Saskatchewan. Designed to take the heaviest locomotives likely to be built, this magnificent structure, a little more than 1,900 feet long, spans the Saskatchewan River, at a point leading from the more definitely agricultural section into timber and mining districts of recognized magnitude. It will afford ready access to all unexplored farm lands and direct transportation possibilities for those who wish to explore and develop mineral expanses rich in promise. The end of the year saw it finished.

Among the major operations of the Canadian Pacific Railway for the year 1929, the Nipawin Bridge, begun in October, 1928, is one of the exceptionally large steel structures in the west. In symmetrical spans it connects north and south banks of the Saskatchewan at about 150 feet above water level of the river. It provides not only railroad transit calculated for 60,000 pounds axle load on the engine drivers, but is made in double-deck fashion with a steel foot highway for vehicular traffic on the lower chords, designed for fifteen ton loading.

This steel roadway, built on a crescent understructure with two inch untreated wearing surface, will carry the Saskatchewan Government's provincial highway across the river. Legislative forces co-operated with the railway company in relieving a situation which naturally proved a hindrance to agricultural development. Hitherto a ferry was required to convey travellers and vehicles across, a mode of travel full of difficulty by reason of the steep descents to the water level on both banks, a particularly serious condition in winter. At each end there is a trestle approach connecting the bridge roadway with the usual highway to the river. What this connecting link will mean in agriculture settlement and progress can scarcely be computed.

T. C. Macnab, Engineer of Construction, describes this latest of Canadian Pacific bridge achievements in the west as of deck riveted steel design with spans 260 feet long. The deck plate girders at the north approach are supported on steel towers each carried on low concrete pedestals. The abutments are of concrete and the four centre spans consist of deck trusses carried on reinforced concrete piers. The three centre piers are 130 feet high from the bottom of the footings and those connecting the outer spans are 120 feet.

Engineering skill of a high order has come into play in the construction of the Nipawin bridge. Mr. Macnab explains that owing to the depth of the water in the turbulent and shifting Saskatchewan channel, vertical supports from the river bed were impracticable. The great 280 foot spans were built out by derrick car from each pier and were added to till the steel stretched horizontally and reached the supporting span at the end of the truss. More than 200,000 rivets have been driven by the air hammers in the field to take care of the eight and a half million pounds of structural steel required in the making.

The bridge has been built by assistant engineer H. D. Brydon-Jack, whose wife, an artist of ability, has painted it with its romantic environs so skillfully that she has produced an art subject of much beauty which is now on display in the Royal Art Gallery at Montreal.

Up where the Saskatchewan waters begin to slough their dun color and take on the blue of mountain streams, this fine structure becomes part of a landscape typical of the vigorous North-West.

When the project was first mooted, D. C. Coleman, vice-president of the Company's Western Lines, referred to this railroad-roadway as one of the finest structures of its kind—a main

gateway to the North, and tangible evidence of the Canadian Pacific Railway Company's faith in the mineral and agricultural resources of Canada's great middle northern area.

Treated Cello With X-Ray

Destroyed Beetle In Wood and Greatly Improved Tone

A musician who played the cello was worried about his beautiful instrument, which was infested with wood beetle and was gradually losing its tone. Having heard of wonderful cures with X-rays, he took the cello to a London hospital and asked whether anything could be done. The doctors were rather amused at the idea, but it suddenly occurred to one of them that a powerful dose of X-rays might kill the beetle. So the cello was put on the X-ray couch and was given a strong dose of the rays.

The novel treatment had the desired effect, for not only was the beetle killed, but the tone of the instrument was much improved. The happened about a year ago, and the delighted cellist went to the hospital the other day to tell the doctor of the lasting benefit of the treatment.

2692

An opportunity to have a Paris dress at the cost of a few yards of material is within your reach.

Style No. 2692 is exquisite printed transparent velvet in lovely plum coloring, most flattering shade for either blonde or brunette.

The vestee of spaghetti faille silk crepe presents a striking contrast, and interesting lingerie touch. Chic femininity is noted in shoulder and hipline bows of plain velvet.

The wrapped treatment of skirt slenderizes the figure, with swathed movement across front. The cascading effect of gathered dounce at left side of skirt provides lovely fluttering fullness when wearer moves.

The surprise closing bodice makes it suitable for women of larger figure. The slightly raised waistline is decidedly smart and youthful.

It is designed in sizes 16, 18 years, 36, 38, 40 and 42 inches bust. Midnight blue crepe de chine is very fashionable for office or classroom. The bows may be made of self fabric or of matching sheer velvet.

Black red canton crepe, tobacco brown silk crepe, Lucerne blue sheer velvet, and leather-weight woolen in coppery tones very chic.

Pattern price 25 cents.

SUPERINTENDENT OF COLONIZATION

R. C. BOSWORTH

Recently appointed Superintendent of Colonization, Department of Immigration and Colonization, Canadian Pacific Railway, with headquarters at Winnipeg. He has charge of the Western Canadian and United States offices of the Department. Joining the Canadian Pacific in 1913, Mr. Bosworth has been actively engaged in colonization work for the Company since that time in Canada and the United States.

Large Metal Shipment

Aluminum Slabs Valued At Over \$1,000,000 and a Half Shipped From Vancouver To Japan

Aluminum slabs and bars to the value of \$1,500,000, originating in the Province of Quebec, have been shipped from Vancouver to Japan. They represent the largest shipment of metal ever to leave the western port—being some 3,000 tons in weight—and it is reported that a second similar shipment will follow shortly. Another outward movement of some importance is that of lead and zinc concentrates from a mine near Field, B.C., to refineries in Japan and the United States. These shipments are likely soon to run from 5,000 to 10,000 tons per month.

Kept To Schedule

"When is the next train out of this burg?"

"Twelve o'clock, sir."

"What? Isn't there one before that?"

"No sir; we never run one before the next."

There are persons who are unable to wear silk without suffering an outbreak of rash wherever fabric comes in contact with the skin.

Many a man who imagines he is a wrestler can't even throw dice.

Indigent Patient Problem

Question Is Discussed By Saskatchewan Medical Council

Efforts to solve what is known as the indigent patient problem have been commenced by medical men of Saskatchewan. While views of the physicians have not been given, the matter was discussed at the annual meeting of the Saskatchewan medical council.

The medical council spent much time on the problem of the relation of the medical man to the public, particularly in regard to indigent people.

"No scheme has been decided on," Dr. O. E. Rothwell, newly elected president states. "A conference has been called for interested organizations in the province and we hope to reach a solution."

"The meeting will be held in Regina some time later this month. The United Farmers, municipal officers, medical men and other interested parties, will take part in the conference. The exact date has not been decided on."

Dr. Rothwell said that the matter was one of much interest to the medical council in the province and elsewhere in Canada. It is expected that it will provide one of the important discussions at the gathering of the British Medical Association which will be held at Winnipeg during August.

It is expected that a number of Saskatchewan physicians will attend the Winnipeg gathering. The association has met on one or two previous occasions in Canada.

Will Discourage Immigration

No Change Is Made In Quota Of Immigrants From Europe

No change has been made in the quota of colonists to be brought from central European countries in 1929, according to officials of the Department of Immigration and Colonization of the Canadian Pacific Railway at Montreal. The reply was given to the question of the number of Menominee families coming to Canada this year. A conference between the railway officials and the Department of Immigration, of the Dominion Government, made allowances for a few Menominee families last September, and since that time no changes have been made.

Teacher—"Why are onions good for us?"

Pupil—"Onions keep us well, because when we eat them no one else comes near enough to give us any germs."

"How did your father know we went out in the car yesterday?"

"Quite simple! You know that stout gentleman we ran over? That was father."

Canada Occupies Foremost Place Among Countries of the World In Systematic Seed Improvement

A Challenge To The West

Western Canada Must Show Superiority Of Our Grain At World's Grain Show

"Mr. Craig, Deputy Minister of Agriculture, points out that the world's grain fair which is to be held in Regina two years hence will put Western Canada on trial as a grain-growing country. The prairie provinces have so persistently invaded Chicago and carried off honors at the International, that they have invited friendly reprisals. Every grain-growing state in the Union, and probably every outstanding grain-producing country in the world, will have exhibits at Regina. Canada's rivals are thus being offered an opportunity to 'carry the war into Africa,' and they have very substantial inducements to do so. If Western Canada can capture the awards at Regina that will be a more convincing demonstration of the superiority of our grain than the honors which have been brought back from Chicago. If outsiders carry away these prizes, the prestige of the grain-growing provinces will suffer in corresponding degree. The grain to be shown at Regina will have to be grown during the next two seasons. It is not too early to centre attention upon that event and begin to prepare for it.—Edmonton Bulletin.

For Study Of Cancer

Colony Of Mice To Be Kept For Experimental Purposes At Laboratory In Maine

A colony of mice, 30,000 to 40,000 of them—will ultimately be under the eyes of scientists at the Jackson Memorial Laboratory, at Bar Harbor, Me., for the study of cancer. Clarence C. Little, director of the laboratory, and former president of the University of Maine, and the University of Michigan, has announced.

A complete record of the life history of each of the small rodents will be kept and although no startling or sensational results are expected, Mr. Little and members of the staff hope to learn some things that will aid in the fight against the disease.

It is again predicted that paper suits for men will be added to the paper plates, paper towels, and other cheap and easily replaceable paper articles in general use.

A sheep's age can be told by its teeth.

NEW BRIDGE ACROSS SASKATCHEWAN RIVER AT NIPAWIN

Where the new Nipawin Bridge spans the Saskatchewan, it takes on the appearance of the artist's drawing at the top of the picture. Vehicular traffic will be carried in the space between the iron-work, and Canadian Pacific trains will travel on the top. (1) shows the piers under construction. (2) In picturesque setting, the main piers of the structure are viewed from Ferry Hill in August, 1929, before the steel arrived. (3) The west towers almost finished December 13. (4) Looking across the completed bridge on the vehicular roadway which meets the Government highway at either end.

Limiting Fish Catch

Only Six Million Pounds May Be Taken In Lake Winnipeg According To Ruling

The limitation on the catch of fish in Lake Winnipeg, has been set at 6,000,000 pounds for this season, according to an announcement by W. A. Foster, Deputy Minister of Fisheries, at Ottawa. The limitation, which is in the discretion of the minister of the department, was originally set at 6,000,000 pounds. Mr. Foster said that in succeeding seasons the figure would revert to 5,000,000 pounds.

Wife (to returning husband at seaside resort): "Oh, darling, I'm so glad you've come! We heard that some idiot had fallen over the cliff and I felt sure it was you."

Book Agent (to farmer): "You ought to buy an encyclopedia, now that your boy is going to school." Farmer: "Not on your life. Let him walk, the same as I did."

Grasshopper m/c's were so named back in 1843 in North Dakota because their fondness for grasshoppers was noted.

"Land me six, until Thursday."

"But suppose you die before then?"

"I am much too honest." — Fagan Gales, Verdun.

Reduce the Acid

Sick stomachs, sour stomachs and indigestion usually mean excess acid. The stomach nerves are over-stimulated. Too much acid makes the stomach and intestine sour.

Alkali kills acid instantly. The best form is Phillips' Milk of Magnesia, because one harmless, tasteless, does neutralize many times its volume in acid. Since its invention, 50 years ago, it has remained the standard with physicians everywhere.

Take a spoonful in water and your unhappy condition will probably end in five minutes. Then you will always know what to do. Crude and harmful methods will never appeal to you. Go prove this for your own sake. It may save a great many disagreeable hours. Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acid. Each bottle contains full directions—any druggist.

WORLD HAPPENINGS BRIEFLY TOLD

The protocol adopting the Young plan was signed at the second Hague reparations conference.

A total of 12,430 post offices operated in Canada last year according to a report just issued by the post office department. This is a decrease of 48 accounted for by the establishment of rural free deliveries.

A reduction in the war office estimates by a million and a half sterling in the next budget, is foreboded in the London Daily Herald, as a consequence of the government's drastic revision of expenditures.

A search is now being conducted for an old post of the Hudson's Bay Company, and the fort of the Northwest Company which once stood close to the Saskatchewan River, about 80 miles north of Saskatoon.

Hon. P. J. Cahlin, Minister of Finance in the Newfoundland Government, told the Canadian Press that Newfoundland would balance its budget this year for the first time in a decade.

Owing to the increase in the number of cheques drawn by persons who have not sufficient funds on deposit to meet them, the banks of Ottawa have decided to make a charge of 50 cents for every such cheque issued hereafter.

Commissioner George Mitchell, international secretary for the Salvation Army's work in Europe, and in the British Dominions, died recently in London. He began his career with the Army as a messenger boy more than 40 years ago.

Executors of the late Gen. Brannwell Booth, former Salvation Army head, have been ordered by the chancery court to turn over to General Higgins, who now heads the Salvation Army, property valued at \$1,000,000 (\$5,000,000).

The beacon light of Brandon Aero club has been put into operation. It is one of the first in Western Canada, and it will be used to guide night fliers, not only on the regular air mail routes, but other altitudes as well. Its flashing rays can be seen for miles.

Pay Big Dividends

About Two Hundred and Fifty Million Paid to Stock Holders in Canadian Corporations

Approximately \$250,000,000 was paid in dividends to stock holders in Canadian corporations in 1929, according to an estimate based on actual disbursements of more than 500 securities listed on the Canadian stock exchanges and others widely held by the general public.

During the year a number of bonuses or extra cash dividends were also paid. In the final three months of last year about \$10,000,000 was added to regular quarterly dividends.

British Columbia Salmon

Salmon canned in British Columbia is exported to over 100 countries in the world. The annual market value of the B.C. product is more than \$13,000,000.

The American gallon is less than the English by one-seventh.

Smoker (whose cigar won't draw): "Now they have invented a smokeless cigar."—Tokio Pakku, Tokio.

W. N. U. 1222

New Building Record

Canadian Permits For Last Year Eight Per Cent. Higher

Building in Canada during 1929 made a new high record for all time. The aggregate total of \$235,858,000 in building permits exceeded 1928 by eight per cent. and was larger than combined totals for 1920 and 1921.

The year 1928 was the previous high record with a figure of \$219,105,000. Figures were made available at the Dominion Bureau of Statistics.

3029

Sunlight and Health

Ultra-Violet Rays Are Necessary To Life and Health

Have you ever noticed your lawn where a board or flower-pot has lain for a few days. The grass will be yellow and will eventually turn white or die. It is the lack of sunlight and the ultra-violet rays which are necessary to the health and life of plants as well as human beings, animals and birds.

Poultriers have discovered that the ultra-violet rays of the sun prevent leg weakness in chickens, and promote growth in a marvellous way. Unfortunately ordinary glass does not allow these vital rays to pass through it with the red and other rays which we know as sunlight. However there is a glass of a certain kind called "Windolite" which is flexible and yet unbreakable and which allows full penetration of these important ultra-violet rays. Up until a few years ago, turkeys were difficult to raise in confinement, but with the brooder houses fitted with "Windolite" they thrive as well as in natural sunlight and get a splendid start in life before they are allowed outside, especially when the weather is cold and wet.

"Windolite" is now being used extensively all over Canada for poultry houses and dairy barns as well as sunrooms, and in hospitals, and sanatoriums where sun baths are a regular part of the treatment of certain diseases.

What Year Is This?

May Be Even Later Than We Are Dating It

Although the past year is recorded as 1929, it may really be, says an article in THE-BITS, 1933, or even later. This fact is indicated by a record of an eclipse of the moon. Bible history says that Christ was born during the reign of Herod the Great. But Herod died in the spring of 4 B.C., the next date being fixed by a lunar eclipse which took place the night before his death. Obviously, therefore, Jesus must have been born not later than 4 B.C., and possibly earlier. The Church had no definite knowledge of the date of Christ's birth. It fixed the year, month, and day of the month arbitrarily. Astronomers are able to calculate the dates of past eclipses as accurately as those of the future, and have determined the very day and hour of the eclipse that ushered Herod the Great out of this life.

Farm Production In B.C.

Coast Province Establishes A New High Record In 1929

Value of farm production in the province of British Columbia totalled \$61,000,000 in 1929, a new high record. The increase over 1928 was \$5,000,000. Increases were distributed over every branch of agriculture and horticulture. The fruit industry, the centre of which is in the Okanagan Valley, had an output valued at \$8,250,000. Dairying showed an advance and the total value of products was \$12,500,000. Returns from poultry were more than \$6,000,000, an increase of nearly \$200,000 over the previous year.

Missed a Fortune

Ignorance Of Geology Was Costly For Prospector

How a fortune was missed as the result of a Gold Coast prospector's ignorance of geology was revealed by Sir Albert Kitson at the recent meeting of the British Association. The prospector in search of gold dug a hole and unearthed manganese ore. He was told to stop digging, but he did not. He continued to dig and finally struck a vein of gold. The prospector had been told that the ore was manganese, but he did not know that. He had been told that the ore was manganese, but he did not know that. He had been told that the ore was manganese, but he did not know that.

Now You Can See 'Em; Hear 'Em At The Grand

Haven't you often wondered just what Moran and Mack, the "Two Black Crows," looked and acted like? Haven't you thought how much fun they would be if you could see them as well as hear them on the radio? Now, you don't have to wonder any longer. Moran and Mack, the "Two Black Crows," have made their first movie, an all talking Paramount picture called "Why Bring That Up?" in which they introduce many of their best selling record hits and a bevy of new tunes.

"Why Bring That Up?" is from an original story by Octavus Roy Cohen, famous author of negro stories. You see and hear how the famous team of Moran and Mack came to join up and start the famous "Two Black Crows" idea. You follow them along the path to fame with all its fun and adventure. You see them produce a lavish musical show in which they star. There's a girl mixed up in it too, she is Evelyn Brent, but neither one of them marries her in the end.

"Why Bring That Up?" is just starting good fun and you'll enjoy every moment of it when you see and hear it, shown at the Grand Theatre, Regina, February 8, 4 and 5.

SUNDAY SCHOOL LESSON

FEBRUARY 2

PUTTING GOD'S KINGDOM FIRST

Golden Text: "Seek ye first His kingdom, and His righteousness: and all these things shall be added unto you."—Matthew 6:33.

Lesson: Matthew 6:1-34. Devotional Reading: Psalm 145:1, 2, 13.

Explanations and Comments

Genuine Charity, verses 1-4.—"Ye therefore must be perfect, even as your heavenly Father is perfect" are the closing words of Chapter V, of Matthew, our lesson of last week. The citizens of the new kingdom must excel the Scribes and Pharisees in righteousness. Matthew next records Jesus' words about almsgiving, prayer, and fasting—three of the great works of which the Pharisees boasted. Jesus emphasized the fact that righteousness is a matter of the heart, and not of the outward show. He said that if you thought of what others may say or think about your almsgiving, charity, that is genuine will not be given in order to receive the praise of men.

Genuine Prayer, verses 5-8.—The Jews had certain times for prayer, and wherever a man was when the prayer hour arrived, there he stood and prayed. Some were there, hypocrites, and fasting—three of the great works of which the Pharisees boasted. Jesus emphasized the fact that righteousness is a matter of the heart, and not of the outward show. He said that if you thought of what others may say or think about your almsgiving, charity, that is genuine will not be given in order to receive the praise of men.

Verily I say unto you, They have received their reward. The Greek word means "received in full," and in the one used in drawing up receipts, they have received the full reward which they were entitled to. They had been seen of men, they have no claim whatsoever to any further reward.

Heaven when you pray to your Father in secret. Jesus said that if you pray in secret, your Father who is in heaven will reward you. He said that if you pray in secret, your Father who is in heaven will reward you. He said that if you pray in secret, your Father who is in heaven will reward you. He said that if you pray in secret, your Father who is in heaven will reward you.

Conference in March

Livestock Men Of Canada Will Meet At Ottawa

A conference of livestock interests to devise ways and means of increasing production will be held in Ottawa, probably early in March. Hon. W. B. Motherwell, Minister of Agriculture, had plans for calling such a conference earlier, but was stricken with pneumonia, but it is expected he will be well enough to sit at a conference in March. Dr. Griesdale, Deputy Minister of Agriculture, will likely preside.

Dentist: "Which tooth do you want extracted?" Pullman Porter: "Lower seven."

Royal Bank Annual Meeting; Assets Exceed Billion Dollars

The annual meeting of shareholders of The Royal Bank of Canada not only marked the close of the most successful year on record, but was rendered specially interesting by constructive addresses delivered by Sir Herbert Holt, president; C. E. Neill, vice-president and managing director, and Morris W. Wilson, general manager.

Sir Herbert, in addressing the shareholders, pointed out that in spite of the recent criticism of Canada's investors throughout the world, and the United States, the strength of the business structure is such that there is no reason to look forward to more than a moderate recession in business during 1930.

Dealing with conditions in Canada, Sir Herbert stressed the fact that neither the prospects in foreign trade nor the situation in Canadian industry, trade and agriculture, warranted pessimism concerning the outlook for the coming year.

Industrial Advisory Council

After dwelling on the success obtained by President Hoover in securing the active co-operation of industrial leadership throughout the country in the recent crisis, Sir Herbert urged that it would be to the advantage of Canada to establish a non-partisan Advisory Council, composed of men of outstanding ability, representative of industry, agriculture and commerce, to advise the government on a closer approach between government, industry, agriculture and labor to what would assist the country when they were in need.

Influence Is Growing

English-Speaking People Are Faced With Great Opportunities

Less than 175 years ago there were only 12,000,000 English-speaking people on the planet, or but three-fifths the population of France. In 1870, there were still but 16,000,000, while France had 36,000,000. Today there are nearly 200,000,000 who speak our tongue. They control all the Australian Continent, nearly all the North American, and much of the African and Asian continents. Their prospects for growth in numbers and wealth are unapproached by any other language group, for Canada, Australia, and South Africa are clearly destined to become populous powers. Taken collectively, the dominions, nations and commonwealths have practical command of nearly half the world's surface and more than half its resources now available. Their sense of duty should equal their pride of power, and if they rise to their responsibilities their influence will indeed be potent—New York World.

Discovers New Drug

Having all the antiseptic properties of iodine, but not stinging when applied to open wounds, a new drug has been discovered by Professor Hans Friedenthal, a physiologist of the Berlin University. He has named the new antiseptic "metajodine," which is said to be made by combining iodine with oxygen.

Made Poor Job Of It

During a recent wedding, the bridegroom, faint, but the ceremony proceeded after a delay of twenty minutes. A cynical correspondent says that the bridegroom evidently hasn't learnt how to faint properly.

formulation and execution of effective measures for the maintenance of that equilibrium which would ensure stable prosperity.

Vice-President's Address

C. E. Neill, vice-president and managing director, submitted to the meeting a very interesting proposal by which Canada might benefit to a far greater extent from the trans-Canada tourist traffic that is coming annually into the country from the United States.

"Canada," said Mr. Neill, "is attracting approximately fifteen million visitors a year. This great annual migration presents an unparalleled opportunity for increasing our trade. As yet there has been no concerted effort to build the tradition that there are purchases which can be made in Canada more advantageously than in the United States. If Canada could attract more than one million dollars a year in our trade."

General Manager's Address

Morris W. Wilson, general manager, reviewed the 60th annual report and balance sheet, for the year ending November 30. The figures, both of assets and profits, constitute a new record for Canadian banking. Total assets of \$1,001,442,741 are a new record, an increase of \$92,048,856 for the year. Deposits have gained \$84,620,923 and now stand at \$772,967,768.

Investigate Land Values

Government To Check Over Lands Held As Security In Connection With Seed Loans

Appointment of L. J. Howe, deputy commissioner of lands for Manitoba, and R. Matheson, assistant commissioner of Dominion lands, as investigators into the value of lands held as security for the repayment of indebtedness incurred by farmers for advances of seed grain, fodder and other relief is announced in the current issue of the Canada Gazette. The appointment is made under the provision of the act, "Respecting Certain Debts Due the Crown."

This merely continues the practice of annually adjusting the obligations of the farmers who have enjoyed the advantages of seed-grain distribution, a return relative to which is automatically tabled in the House of Commons near the beginning of each session.

L. P. O. Noel, agent of Dominion Lands, at Winnipeg, is authorized to act in Mr. Matheson's place in any particular instance.

Port Arthur's Population

Port Arthur's population, according to the assessment commissioner, is now 20,002, or an increase of 750 over last year.

"The African is the only happy human I have come across," said General Smuts, at Oxford, recently. "His outlook is so easily satisfied, so good-natured, and so care-free."

When the sewing machine for shoes was first introduced one man could do as much as 60 had done before by hand.

Make Your Windows Pay

Invest in WINDOLITE Windows and you will be repaid a hundredfold in the health of your Poultry and Live Stock

WINDOLITE

THE ORIGINAL GLASS SUBSTITUTE

MADE IN ENGLAND SINCE 1917 ON ORIGINAL PATENTS

This unbreakable glass substitute is light and flexible, easy to cut and fit, will withstand extreme changes in temperature, keeps out cold and wet, but allows the full sunlight to enter, including the health-giving Ultra-Violet Rays, which do not penetrate ordinary glass.

Canadian breeders of poultry and livestock are finding Windolite a most satisfactory and profitable investment. Young chickens and turkeys are entirely free from leg weakness and disease and will thrive in confinement under Windolite. Windolite comes in rolls any length, but 36 inches wide only.

Distributors: JOHN A. CHANTLER & CO., LTD.
51 Wellington St. W. TORONTO, ONT.

DELEGATES ARE WELCOMED BY CITY OF LONDON

London, Eng.—London city welcomed the delegates to the five-power naval conference, and as never before, perhaps, the old Guildhall resounded to pleas for international co-operation and goodwill. They threaded their way through the welcoming speeches of Sir William Waterlow, Lord Mayor and the replies alike of the premiers of Great Britain and France.

And in the historic hall was much that told of the city's far-flung commerce and the part her leaders had played upon the sea. The calls of the trumpeters, resplendent in gold-laced uniforms, rang back to the early days of the London guildhalls. About the walls hung tattered colors of city regiments. The menu itself bore on the cover the picture of an old square-rigged ship, all sails set, driving its way out to sea.

It was the trader's need for peace that the lord mayor emphasized in his welcoming words. "The people of all nations," he declared, "are yearning for that international co-operation which will enable us to return with diligence and devotion to their peaceful vocations. The ultimate guarantee of security, individual or national, is always goodwill."

"To play its part among the peoples of this great world," Premier Tardieu echoes, "to make them understand each other and bring them together, commerce demands that there should be no war," he proceeded.

"I affirm in the name of all—Americans, British, French, Italians, and Japanese—that we are determined to succeed. We have faith, that faith which it is said moves mountains, and which, therefore, at least we hope so—will move naval armaments from the perilous waters of competition to the safe harbor of loyal understanding."

"We shall secure that triumph Premier Tardieu added, "her heart and soul we are determined to win international peace through international law; because, following on the oft-repeated advice of my eminent friend and colleague M. Briand, we seek that peace with the same creative energy which we, in the past, devoted to the cause of national independence and national security."

Prime Minister MacDonald spoke briefly. London city, he said, stood in the forefront of British commerce and industry. There was no municipality more entitled than the corporation of London to proclaim such doctrine as those proclaimed by the lord mayor—that commerce and peace went hand in hand.

"There is no municipality that knows better by experience," Premier MacDonald added, "that international peace and confidence are the great foundation stones of international prosperity."

Mountie Wins Promotion

Inspector W. W. Watson Will Be Stationed At Lethbridge.

Ottawa, Ont.—The promotion of Sergeant-Major W. W. Watson to rank of inspector has been announced here at headquarters of the Royal Canadian Mounted Police.

During his 20 years of service with the force Inspector Watson has been stationed at various points in Western Canada and in the Capital. He served here in the Bureau of Criminal Investigation. Inspector Watson will now be stationed at Lethbridge, headquarters for the southern Alberta District.

Air Mail Service Deferred

Opening Date Set Back Owing To Delay In Installation Of Lights

Ottawa.—The date for opening of the western Canada air mail has been deferred owing to delays in completing the installation of lights along the route. The severe weather of recent weeks has prevented the work from being completed. Officials here would not hazard a guess as to the extent of the delay. There is little chance of its taking place before the middle of February.

Ends Long Snowshoe Journey
Ottawa.—Jean Baptiste Chouinard, a barber of Notre Dame Du Nord, Que., 435 miles north of Crossfield, arrived in Ottawa after having snowshoed the 435 miles in less than 13 days. Mr. Chouinard has gone to Quebec City to participate in the Quebec to Montreal snowshoe race on February 3. Later he will return to the capital to take part in the winter carnival.

W. N. U. 1822

Habeas Corpus Writ

Application Of Harry Bronfman Granted By Supreme Court

Ottawa.—A writ of habeas corpus was issued by the Supreme Court of Canada on application of Harry Bronfman, wealthy liquor dealer of Montreal, who is under indictment before Saskatchewan courts on charges growing out of alleged liquor transactions. The writ is returnable on February 1, on which date Bronfman will be brought before the Supreme Court.

Saskatchewan authorities will then be required to show cause for his detention.

This is stated by court officials to be the first time in 25 years that a writ of habeas corpus has been granted in the Supreme Court.

The motion was made in Chambers to Mr. Justice Duff. Counsel included Eugene Lafleur, K.C., and Gregory Barclay, K.C., both of Montreal, and A. G. MacGillivray, K.C., of Calgary. As the application was ex parte no one appeared on behalf of Saskatchewan authorities.

The prosecution is defective, Bronfman's counsel contended, because the charge is laid under the Criminal Code, when it should have been laid under the Customs Act. Furthermore, if laid under the Customs Act, the prosecution could not succeed because the charge would be outlawed. The Customs Act requires that charges must be laid within three years of the time the alleged offence was committed.

Will Sell Power Plant

Moose Jaw Bargains Decide To Sell Franchise To American Concern

Moose Jaw.—After a quarter of a century of municipal ownership, the city of Moose Jaw consented to the sale of its electric light and power plant to the Iowa Southern Utilities of Delaware, Davenport, Ia., by a sweeping vote of over three to one. The number of burgesses voting for was 2,250, and the number against, 744, a two-thirds majority being required for the by-law to carry.

By the passing of this by-law, subject to ratification by the Saskatchewan legislature, the largest power transaction in the history of the province will have been completed. Involved in the offer which has been accepted by the city is a sum in the neighborhood of \$3,500,000, the largest single sum of money to be offered for any public utility in the province. The voting brings to a close the bitterest of the bitterest battles in the city's history, the power situation having been a bone of contention and discussion for over 12 months. The Board of Trade supported the sale; the local press opposed it.

Canadian Boat Rammed

United States Coast Guard Vessel Said To Have Pursued Vancouver Motor Boat

Vancouver.—The new Vancouver deep sea motor boat "Talheiy Maru" was rammed by the United States coast guard vessel "Bonham" on January 17, and has been beached on one of the Guadalupe Islands, off the Mexican coast, according to advices received by the vessels owners here. A protest has been sent to Ottawa concerning the incident.

Captain J. Butler, master of the "Talheiy" states that his vessel was in ballast, bound for home when she was pursued and run down by the "Bonham." She had no liquor on board nor had carried any on the trip, he states.

Sealed Letter Destroyed

Lawyers Burn Envelope Containing Name Of General Booth's Nominee

London, England.—The Daily News says that the sealed envelope containing the name of the late General Bramwell Booth's nominee to succeed him as head of the Salvation Army, was burned unopened by the solicitor of the Army, in the presence of several commissioners.

The envelope had figured prominently in the discussion of Army affairs leading up to the removal of General Booth a year ago. Many guesses had been made as to the identity of the man whom the general believed best fitted to succeed himself.

Left Small Estate

Liverpool, England.—The estate of the late "Tay" Fay, O'Connor, dean of the House of Commons, writer and journalist, proves of a value of only \$1,500. This was forecast by the Canadian Press at the time of his death. The gold snuff box, presented by members of the House of Commons, is left to the House of Commons. His portrait by Beeson is left to the Walker Art Gallery, here. No provision is made for his wife, but she is otherwise well provided for.

Saskatchewan Resources

Provincial Government Will Not Agree To Commission Suggested By Premier King

Regina, Sask.—Saskatchewan will not agree to the commission suggested by Premier King in his proposals for the return of the natural resources. The Provincial Government suggests a commission of three; one chosen by the Federal Government, one by the Provincial Government, and a third commissioner chosen by either the Imperial Government or both the Provincial and Federal Governments. This commission would hear the claims of Saskatchewan for all alterations subsequent to 1905.

The Provincial Government is prepared to refer its claims to the Supreme Court of Canada, subject to an appeal to the Privy Council, should the contents of the Provincial Government be upheld by the courts. The question of the accounting between 1870 and 1905 would then be referred to the chosen commission. On agreement being arrived at, the question of compensation and the amendment to the constitution would then be submitted to the Provincial Legislature at an early date that it might be given effect to by the Imperial Government.

FEDERAL AID IN DEALING WITH UNEMPLOYMENT

Ottawa.—If the provinces of Canada join together in admitting that they cannot cope with the unemployment situation, the Dominion Government is prepared to discuss remedial measures with them, Premier MacKenzie King told a large delegation from the Trades and Labor Congress.

The Prime Minister added that the financial position of several of the provinces did not indicate that they were unable to cope with the situation, especially as it appeared to be largely seasonal. Unemployment, in the first instance, said Mr. King, appeared to be a municipal responsibility.

If it became too serious for the municipalities to handle, their appeal lay to the provincial government. If the province found that it could not cope with it, the problem became a national one, and the Dominion Government would expect to be asked to assist in solving it. But, in the absence of an admission by all the provinces that they were faced with a problem which they could not meet, the Dominion Government did not feel called upon to take action.

Both the Prime Minister and Hon. Peter Heenan, Minister of Labor, dealt with the unemployment situation. Mr. King informed the delegation the government has been pursuing a policy of keeping men employed on government contracts at work.

Both Mr. Heenan and Mr. King referred to the demand for a national unemployment conference.

Mr. Heenan insisted that he had not given the impression in his statements that he was unaware of unemployment. He knew there was unemployment, but he felt the calling of a national conference would exaggerate its importance in the public mind and perhaps accentuate the situation.

This was the view expressed by the Prime Minister. Mr. King made it clear that Mr. Heenan had voiced not merely his personal view of the matter, but the opinion of the government on the unemployment question.

Named After Premier's Daughter

Towering 9,440 feet into the sky, the newly named Mount Isabel, so called after Miss Isabel Macdonald, daughter of the Labor Premier of Great Britain, is located about twelve miles west of Banff, in the Canadian Rockies, overlooking beautiful Mistle Lake. The Canadian Government have paid Miss Macdonald this graceful compliment in commemoration of her own and her father's visit to Canada last Fall. The peak is visible from Banff, on the Canadian Pacific Railway, and also from the roadway between Banff and Lake Louise. Inset Miss Isabel Macdonald.

WAS PEACE ADVOCATE

Edward W. Bok, editor, author, philanthropist and earnest advocate of international peace, who died at his home in Lake Wales, Florida, recently at the age of 66.

Letter Carriers Ask

For Higher Salary

Civil Service Commissioners Promise Delegates To Consider Request

Ottawa.—Serious consideration was promised by the civil service commissioners to requests for higher salary schedules for all letter carriers presented by a delegation of 100.

The delegation presented data showing salaries paid in comparable employment, and discussed various sides of the question with the commissioners. The matter of increases in mail carriers' salaries occasioned a considerable amount of discussion in the last session of parliament. Hon. P. J. Veniot, postmaster-general at that time expressed himself in sympathy with the carriers' position, but pointed out the matter was purely one for decision by the civil service commission.

Sheep Breeders

Of Saskatchewan

Officers Are Elected At Annual Meeting Held In Moose Jaw

Moose Jaw.—W. C. Heron, Hinton, was elected president of the Saskatchewan Sheep Breeders' Association, at the annual meeting held in Great Hall Hotel.

Other officers of the association are: Charles Buttan, Bechar, vice-president; directors: I. J. Rushton, Rosanville; W. D. Lyon, Deveron; W. L. Morrish, Oxbow; James Whitehead, Nutana; A. Richardson, Semans; William Darnborough, Laura.

Of Advantage To Customers

London, England.—We have established during the year a bank in Canada, in the city of Montreal. We have every reason to be satisfied that this direct line will be of advantage to any of our customers carrying on business between Great Britain and growing markets of Canada, stated F. C. Goodenough, chairman of Barclay's Bank, Limited, in his address at the annual meeting of shareholders held here.

Quebec's Minimum Wage

Quebec, Que.—A minimum wage for women workers in the province of Quebec, outside the city of Montreal, has been adopted by the minimum wage commission, stipulating that workers with two years' experience should be paid at least \$10 per week. Apprentices will receive \$6 per week, with the rate increased by one dollar each six months.

Eleven Killed In Crash

Ohio Has Fourth Bus Tragedy In Three Weeks

Cleveland, Ohio.—Ten children and a bus driver were killed at Berea, Ohio, here, when the bus was hit by a New York Central mail train bound for Chicago, at the Sheldon Road crossing, near Berea. Three other children, seriously hurt, were taken to the Boco hospital.

Most of the victims were small children who attended from the first to the sixth grades.

The bus was said to have been carrying between 15 and 20 children. The crash was the fourth bus tragedy, in Ohio in the last three months.

Kept Link Unbroken

Radio Engineer Used His Body As Current Switch

New York.—His arms twitching with shocks from electric current, Harold Lively, a young radio engineer, literally spliced with his body a broken link in the vast hook up and made it possible for listeners in 38 North American radio stations to hear the King's speech at the naval conference.

Just before the King began somebody in the control room of the broadcasting company tripped over the wires of the generator. Lively grasped the wires together in his hands to restore the circuit. Leakage of current through his body to the floor shook his arms without a break, for 20 minutes until new wires could be connected.

TO WIDEN SCOPE OF ALBERTA HEALTH CLINICS

Calgary.—State medicine is certain to be established in Alberta "and everywhere else," according to Hon. George Hoadley, provincial minister of health, speaking to the annual convention of the United Farmers of Alberta. He admitted he had no apology to make for the accusation that his office was "up to the eyes in the wedge of state medicine."

Comment from the Alberta cabinet minister followed approval by the convention of resolution widening the scope of the travelling health clinic in order to give free annual medical examination to every rural school child. Among a score of resolutions carried, was one favoring hurried completion of a Peace River rail outlet to the Pacific Coast.

The Peace River resolution urged the importance of fulfillment in the near future of Premier W. L. Macdonald's promise in 1924 that the line would be completed "as soon as humanly possible." Intention of the farm body will be communicated to the Dominion Government, the Canadian Pacific, the Canadian National and the Northern Alberta railways. It was stated that the route was now not financially difficult; that production of Peace River area has increased since 1924, and that 10,000 new homestead entries have been made in the district in the last two years.

A trio of resolutions directed to the Dominion Government favored decision by parliament, rather than by the Canadian prime minister in setting the date of Dominion elections; suggested legislation to require food products in containers to carry the name of their country of origin; and requested appointment of a committee to inquire into the feasibility of grading all products offered for sale in Canada.

Mr. Hoadley's forecast on the future of state medicine involved a statement that larger units than the municipality, as organized at present, would be necessary in development. He believed that the units would have to be large enough to be able to support a full range of medical equipment adequate for cure and prevention of disease. Previously, the convention had instructed the central U.F.A. executive to make a full investigation of state medicine in all its branches.

If the Alberta legislature provides the necessary finances, Mr. Hoadley mentioned, the Department of Health intended to employ a specialist in connection with examination of the eyes of children. He stated that since 1924, 24,000 school children have been treated by the public health clinics of the province, the only system in existence in the country. Not a single death, he said, had resulted in this time, though 4,054 tons and adenoid operations had been effected.

WHEAT SUPPLY SHOWN TO BE ABOUT NORMAL

Winnipeg.—All through the present crop season there has been emphasis of the large stocks of wheat in Canada. "Visible supply" has been held up to the world as representing a formidable total, but seldom has any mention been made of the "invisible supply," which at mid-January was estimated to be 60,000,000 bushels less than a year ago, and considerably smaller than the "invisible" on the same date in any of the past five seasons. By the "invisible supply" is meant the amount of wheat that farmers will have to market after taking care of seed and feed requirements on the farm.

On January 15, this year, it was estimated that only 21,000,000 bushels of wheat remained to be delivered by the farmers in Western Canada to the end of the crop year on July 31, 1930, as compared with 82,000,000 bushels delivered in the same period in 1929, 102,000,000 bushels in 1928, 52,000,000 bushels in 1927, and 45,000,000 bushels in 1926. A short crop and unprecedented movement from the farms last fall under ideal weather and road conditions are accountable for the small farm reserves at this time.

Turning to the "visible supply," which includes wheat stored in country elevators, interior and lake terminals, loaded on boats for winter storage and in all other positions except on the farms, it is seen that the stocks at mid-January this year were larger by some 3,000,000 bushels than those of a year ago, but with 60,000,000 bushels less to come off the farms there is a difference of 57,000,000 bushels in favor of the current season.

Allowing for exports at the same rate as last year between January and July 31, it would mean that the large carry-over of last year would be reduced by that figure and that Canada would start the next crop season with less than 60,000,000 bushels compared with 120,000,000 last year, and 78,000,000 bushels the year before.

Reporting Naval Conference

World Will Receive News Through Four Hundred Correspondents

London, England.—The world will receive news of the five-power naval negotiations through nearly 400 newspaper correspondents accredited to the conference, who will have offices in St. James's Palace throughout the proceedings.

An historic room of the palace, the guard room, where tradition has it King Charles I. slept the night before he was beheaded, is the local point of a network of cable and telephone communications extending to the four corners of the globe.

Press wires run direct into St. James's Palace for the use of a special corps of staff correspondents representing the Canadian Press, the Associated Press, and other press services, while direct telephones also are available for everything from local calls in London to transatlantic calls.

Want Patrol Augmented

Not Strong Enough To Enforce Law Says U.S. Immigration Official

Washington, D.C. Immigration officials want more men on horseback to patrol the Canadian and Mexican borders, and more ship sleuths to search out stowaways.

Testifying before the House appropriations sub-committee for the Labor Department annual supply bill, Immigration Commissioner Harry E. Hull and his assistant, W. H. Wagner, painted the border patrol of the present in glowing colors, but declared that immigration laws cannot adequately be enforced unless it is augmented.

Cook May Be Paroled

Leavenworth, Kas.—The Leavenworth Times says that a parole has been recommended for Dr. Frederick A. Cook, Arctic explorer and oil promoter, who is serving a sentence of 14 years and nine months in the federal prison here for using the mails to defraud. Members of the parole board would not confirm the report, but it is known that no opposition was offered to Dr. Cook's release.

Lloyd George Missed Speech

London, England.—Lt. Hon. David Lloyd George was left out in the fog while the King delivered his address at the opening of the naval conference. The Liberal leader, and war-time premier, needed an hour and three-quarters to make the short journey and missed the pinary spectacle altogether.

Sun Room Of The Empire

His Excellency Viscount Willingdon
Delighted With Trip To the
West Indies

By developing contact with the West Indies, Canada has made an exceedingly valuable contribution to the Empire in the opinion of His Excellency the Governor-General, Viscount Willingdon, who with Lady Willingdon and members of their party, have returned to Canada, after six weeks in the tropics, highly delighted with their trip and enthusiastic about relations between the Dominion and the islands.

For too many years, said His Excellency, the West Indies had been isolated, not only from other parts of the Empire, but from themselves, from one another.

It was one of the most encouraging trips I have ever taken," said Lord Willingdon. "The enthusiasm for Canada was so great that I would go so far as to say that the West Indies, in thinking of their future, look to Canada. They regarded our visit as a further evidence of the Dominion's desire for even closer relationship."

Lacking consistent inter-communication, the various islands, His Excellency went on to say, had developed individually and independently, and he saw the necessity for closer co-operation between the islands and the mainland.

"Of course the West Indies stand to benefit materially by trade with the Dominion and they are quick to realize it. But Canada will derive advantages, too, and the whole thing will serve the Empire by pulling these two sections of it together," His Excellency declared.

Apart from trade, His Excellency saw another good reason for the closer linking of Canada and the islands of the Caribbean.

"There is no reason," he said, "why these beautiful islands should not be the sun-room of the Empire. Lady Willingdon and I cannot say too much in praise of the West Indies from the standpoint of the traveller. If Canadians knew more about them they would give up going to Florida and California in winter."

Hard Place To Navigate

Magnetism in Gulf Of St. Lawrence
Compasses To Deviate

We all know that the early mariners often went into grief in the Gulf of St. Lawrence because of strange magnetic properties there, which caused the compass to deviate.

Now it appears that another discovery has been made, namely that at two points close to the plumb line hang vertically. Along the shores of the Gulf of St. Lawrence, we are told, these deflections are of such magnitude and differ so greatly at various points that they must be determined with the greatest accuracy in order that appreciable errors may not creep into the maps of the district.

During the past summer the Geostrophic Survey of Canada has completed a series of observations along the Gaspé Peninsula from Rivière du Loup to Campbellton for the purpose of discovering and eliminating these errors.

We live and learn. There may be something in Einstein's theory after all, and we may even discover that somewhere in this mysterious St. Lawrence region two parallel lines actually can meet.

Manitoba Cattle For Australia

Sixteen head of registered Aberdeen-Angus cattle have been shipped recently from Glenora stock farms, Brandon, owned by Hon. James D. McGregor, Lieutenant-Governor of Manitoba, to Australia and New Zealand. These followed an earlier shipment of 28 head from the same farms to the Antipodes.

The condor is the largest bird that flies.

"I did a wonderful operation: I removed the patient's liver, one lung and two kidneys."
"How is he?"
"Dead of course."—Esquella, Barcelona.

W. N. U. 1822

The Poultry Industry Of Italy

Mr. F. C. Elford In Italy En Route On Behalf Of World's Poultry Science Association

In his recent visit to Italy on behalf of the forthcoming World's Poultry Congress, to be held in London, England, in July of this year, Mr. F. C. Elford, Dominion Poultry Husbandman, president of the World's Poultry Science Association, and vice-president of the congress, discovered that considerable attention is being given to the poultry industry by the Government at Rome. He found there a very old organization called The Federated Societies, which not only directs the breeding work but also takes the place of advisor to the Department of Agriculture in regard to the poultry industry. So close is this organization to the Government, that in a short time before Mr. Elford's visit the association moved its staff into the office of the Royal Palace of Italy.

At Rome is the principal poultry breeding station, where Mr. Elford found the descendants of Canadian "Rocks" and "Leghorns" taken to Italy after the 1897 Congress, at Ottawa. The first year the Canadian birds did not do well but the first generation pullets in one pen laid 335 to 239 eggs each. Two of these hens raised broods of chickens. Very fine groups of cockerels and pullets from Canadian stock were also seen by Mr. Elford. Italy possesses a local breed known as "Valdarno," a small breed somewhat similar to the Black Leghorn. This is one of the more common breeds of the country and gives quite good results.

How Nature Protects Trees

Removes Leaves In Fall So Water Can Nourish Roots

Trees shed their leaves in the autumn to keep from dying of thirst through the winter, says Martin L. Davey, the tree expert. "On the average there are several acres of leaves—literally millions of them," says Davey. "Every leaf gives off water. But during the winter the tree's roots absorb very little moisture. Consequently, if the leaves remained on the tree and continued to tap the water supply, the tree would soon die. So nature sentences the leaves to death."

The process used by nature to make the leaves fall is complicated. Weeks before the first frost the buds begin to extract from the leaves all the food substance which the leaves manufacture and which the tree needs, and gradually the leaves wither. Simultaneously, a thin-walled layer of cells is formed at the base of the leaf where it is attached to the twig. This layer is a zone of weakness, so that eventually the leaf falls of its own weight or is blown off by the wind.

The scar left by the falling of the leaf is well protected by nature. It immediately becomes covered with a substance which is practically waterproof. Since the bark of the tree is also almost impervious to water, the entire tree is practically "bottled up" for the winter."—The Pathfinder.

A Truly Wise Man

Is One Who Realizes He Is Not Wise

An article in E. W. Howe's Monthly says: "Because I am 76 years old I do not believe I am wise; on the contrary, I have been remarkably lately that there does not seem to have ever been a wise man in human history. Some have had more intelligence than others and more experience, but the mistakes of the more notable ones have led me to conclude that an endowment of wisdom is impossible in creatures of our kind."

The best we can do is to experiment cautiously and extensively and come to such conclusions as are warranted. Any man who is prejudiced is unable to come to sound conclusions; and we are all prejudiced. That seems the reason we cannot become wise."

World's Largest Cable

Abnormal strains imposed on ships' cables by the heavy ocean swell in the Pacific Islands, led in Sydney, Australia, manufacturing firm to design a special anchoring rope, which is claimed to be the biggest in the world. It is 400 feet long and weighs two tons.

The historic Dead Sea, of Palestine, is so full of salt that no fish can live in it. Various projects are on foot to garner its mineral wealth, which is said to be very rich.

In Japan is a settlement where the wives support the husbands and children are the acknowledged heads of the family. The man keeps house.

It is estimated that the normal mortality of young birds is about 50 per cent.

Palestine is slightly larger than the state of Vermont.

RECEIVES NEW APPOINTMENT

L. W. Simms, of St. John, N.B., last year's president of the Canadian Manufacturers' Association, who has been appointed chairman of the finance committee of the Religious Education Council of Canada.

Reason Most Persons Are Right-Handed

Because Left Side Of Brain Is Larger Than Right

Have you ever tried to do anything with your left hand and noticed how awkward you are? Or if you happen to be left-handed you can't do very much with your right. Why is it?

This is the reason: The left side of the brain controls the right side of the body and the right side of the brain controls the left side of the body. The larger side of the brain then controls the most active hand.

In most cases, the left side of the brain is larger than the right because the blood supply seems to be richer. So it seems that because it is the easiest thing, most people become right-handed.

Try writing your name with your left hand and see what success you have. Your crooked writing only means that you have not cultivated writing habits with that hand.

Noise Retards Growth

City Animals Smaller Than Those In Country Is Discovery

The latest discovery as to the effect of city noise is that it stops the growth of animals. Those which are exposed to the roar and rattle of streets do not reach the same size as others which are brought up in quiet country surroundings. Probably it has the same effect on human beings. We have not had the motor with its long enough to know for certain, but the nervous strains caused by living amid strident and cacophonous sounds might well divert energy from growth. City folk in any case are usually smaller than the average. They may become smaller still.

There are between 400,000 and 500,000 miles of cable lying on the sea floor—enough, if joined together, to circle the globe some seventeen times.

Goddess Of a Thousand Hands

Banner Of the Junior Red Cross Falls Like a Benediction On All Who Suffer

Somewhere in the marvellous East, there is a Goddess of a Thousand Hands who is worshipped as the Deity of Charity and Mercy. Her devotees pay homage to her and laud her for the beautiful quality of compassion she is supposed to possess.

Somewhere in the wonderful West you may see, not a Goddess, but a "Thousand Living Hands" outstretched in deeds of loving kindness and tender mercy. The sick and the suffering are blessed by these kindly hands and hearts overflowing with an infinite pity for the unfortunate and the unhappy. This work of the Thousand Hands is known as the Junior Red Cross, and is found in the little white school house by the wayside, as well as in the palatial halls of learning of the great cities. Children the world over are eagerly reaching out their hands in help to their fellows under the banner of the Junior Red Cross which falls like a benediction on all who suffer.

Truly there is as great a wonder in the West, as in the temple of the "Goddess" of the East, for one is human and real, and the other but a myth of the mind.

Germany's Floating Theatre

Ship Equipped With Modern Stage Will Cruise Around World

The newest German idea for entertainment is a floating theatre, the which purpose an old-fashioned four-masted schooner has been requisitioned. The ship will be called the "Pro Arte" and will cruise round the world, visiting such places as Hamburg, London, Spanish ports, South America, Baltimore, New York, and the Azores. The vessel will be equipped with a modern stage. There will be seating accommodation for five hundred people, and plays representative of the German spirit will be presented. There will also be on board an old German beer and wine tavern.

As regards the production of grain, he explained that southern Saskatchewan grows approximately 50 per cent. of the total crop. Poultry growing had also reached considerable proportion, while some 30 creameries were located at strategic points across the south section.

Using maps and charts, Mr. Leamouth explained the division of southern Saskatchewan into four parts, and followed with statistics to show distribution of livestock raising. Among facts revealed was that southern Saskatchewan, taken as a whole, was responsible for the raising of 46 per cent. of all the horses of the province; 39 per cent. of the cattle; 37 per cent. of the milch cows; 62 per cent. of the sheep, and 42 per cent. of all the hogs.

Further, Mr. Leamouth stated that ranching production had not reached a maximum either as regards quantity or quality.

As regards the production of grain, he explained that southern Saskatchewan grows approximately 50 per cent. of the total crop. Poultry growing had also reached considerable proportion, while some 30 creameries were located at strategic points across the south section.

Many Boys Have Started Musical Career With Mouth-Organ

Just as the city dweller finds in a window flower box an expression of love for the beautiful, so does the small boy, and sometimes the boy not so small, find in a harmonica, or mouth-organ, a vehicle for musical talent. To concert-goers, accustomed to the mastery technique and finesse of a symphony orchestra, the mouth-organ may be a thing of contempt, but to many a boy it is all-sufficing. It heartens him on his errand, puts rhythm into his step, and although it has sunk to the level of the pavement artist, it has also risen to the heights as a companion to the sailor at sea.

It is well to remember these facts as small boys, up for an explanation of the popularity of the mouth-organ. Popular it is. Germany alone exports 50,000,000 mouth-organs every year. But it does not propose to stop there. A factory has been completed in Berlin by which it is intended not only to control the mouth-organ market, but also to increase the demand for the instrument to which the ingenuity of the boy has given such strange variety.

It would be unwise to put the mouth-organ down as a mere toy. Many a boy whose career has been hewn out of the rock of classical music has made his start on a mouth-organ, and has found an opportunity for self-expression which otherwise might have been denied him. All men do not sing. Some play. To some the memory of their first adventure into music with a mouth-organ is still green, and to them the mouth-organ will remain an instrument which, while lowly, is not necessarily low.

Collector: "What's that got to do with it?"

Purchaser: "I play very poorly."

More Independence On Farm

The old myth that opportunity dwells only in cities was exploded long ago. While it is true that such great financial and industrial successes as are achieved by the very few are possible only in cities, farm life offers the greater certainty of independence and competence.

First Cynic: "They say that 'hundreds of people separate after only a few weeks of married life.'"

Second Cynic: "But why the delay?"

Paul Revere's ride is supposed to have covered ten miles.

Diversified Farming

Agricultural Possibilities Of Southern Saskatchewan Discussed At Recent Meeting

Economic possibilities of diversified farming in southern Saskatchewan were fully discussed at a meeting of the Southern Saskatchewan branch of the Technical Agriculturalists, at Regina, C. M. Leamouth, superintendent of instruction on farms for the provincial government, was the speaker, dealing with various phases of agriculture. Following the address, discussion was led by J. G. Robertson, provincial livestock commissioner; P. B. Reed, dairy commissioner, and W. H. McLellan, poultry promoter. H. S. Fry, director of publicity for the Saskatchewan wheat pool and president of the society occupied the chair.

Mr. Fry was chosen to represent the society at the dinner to be sponsored by the University of Saskatchewan alumni association in honor of Dr. Murray, president of the university, who will soon have completed 25 years in that office. The dinner will be held in the near future. Robert Savill was chosen to represent the organization at the dinner to be held later in the year by the Western Canada Livestock Union.

Using maps and charts, Mr. Leamouth explained the division of southern Saskatchewan into four parts, and followed with statistics to show distribution of livestock raising. Among facts revealed was that southern Saskatchewan, taken as a whole, was responsible for the raising of 46 per cent. of all the horses of the province; 39 per cent. of the cattle; 37 per cent. of the milch cows; 62 per cent. of the sheep, and 42 per cent. of all the hogs.

Iodine Valuable In Stock Feeding

Losses Prevented When Fed To Stock During Winter Months

Poor management and not poor luck is at the bottom of many of live stock losses. It is always to be born in mind that practically all domestic animals are being kept in an abnormal environment. Under natural conditions they would roam at will, and instinct would direct them to the various foods to keep them in healthy condition. From this it will easily be seen that the aim of the stockman should be to supply conditions as near to the natural as possible.

During the summer months, there is little need for worry, when the stock is on the open range, but where confined part of the time as is the case with dairy cattle, or where it is known that a district is deficient in a certain vital element, even at these seasons, care must be taken in balancing up the ration, particularly in supplying the minerals.

Take the case of iodine, for instance. As pointed out by Dr. Lionel Stevenson, Provincial Zoologist for Ontario, there is no substitute for this. Goitre in lambs and calves, hairless piglets, joint ill in foals, are all likely due to a lack of iodine in the rations fed to the breeding stock. In some sections of the country, there is a natural deficiency of this material and iodine should be fed in small doses all the year around; in other places its use is only essential during the stabling season. But, as the drug costs but a few cents per animal per year, and as it is easily procured and handled, it is cheap insurance. It is particularly essential that iodine be included in the feed of pregnant animals, to ensure healthy offspring.

In a pamphlet on this subject, prepared by George B. Rothwell, of the Dominion Experimental Farms, and distributed by the Canadian Co-operative Wool Growers, Toronto, such organization will mail copies on request, the necessity of iodine is stressed and the practical ways of feeding it are described. Potassium iodide is by far the more generally used of all forms of iodine, points out Mr. Rothwell, who adds that this material may be purchased from live stock co-operative association, supply houses and druggists, and prepared at home by mixing with salt or the drinking water. Stock solutions are usually prepared with the different animals, no attempt is made to go into details in this limited article. Mr. Rothwell in his bulletin has covered the whole subject, and live stock men are urged to see for his directions before starting to add this foreign element to the rations of their live stock.

The Weak and the Strong

To the Strong, a Fall Reveals a Stepping Stone To Higher Things

There is a world of difference between falling and falling. The tragedy of business and social life is that so many people think that a fall is a failure. They fall, and then lie down broken-hearted to die. Every successful and happy person converts a fall into an inspiration to go higher. Success lies not in never falling, but in rising every time you fall and rising stronger than ever. Do not watch the slippery and sloping places. To the strong, a fall reveals a stepping stone. To the weak it shows a stumbling block. We should strive to be like the heroes in the old Greek myth, and become stronger every time we are hurled to Mother Earth.

A great painter once mixed the wrong paints, and nearly destroyed a canvas. Later, he saw that he had discovered a new color.—London Daily Chronicle.

Will Not Tear Or Burn

calves, 10 and 7 months old, I will
coming 3 years also some Pure Bred
Shorthorn cows and heifers coming
fresh soon. Your chance to get a good
one. A. LINDGREN, Crossfield.

Many people are of the opinion
that a hard winter holds promises
of a good season following. In
that case we are in for a big crop
in 1930.

Hog Prices Advance

Hogs advanced \$1.00 per cwt.
during the past week. Bacon hogs
\$13.00; select bacon \$13.50, butch-
er \$12.65. These are Calgary prices.

The U.F.A. shipped a car of hogs
to Calgary on Wednesday.

Send in your local items to the
Chronicle

Standing of Curlers

The following is the standing
of the curlers in the Inter-Link
Competition for the Cruickshank
Cup and four gold medals donat-
ed by Adam Cruickshanks prop-
rietor of the Oliver Hotel, Cross-
field.

Results include games of Wed-
nesday night, Jan. 29.

	Won	Lost
G. Williams	8	2
Gilchrist	8	2
Miller	7	3
Pogue	6	3
J. Williams	7	4
E. Meyers	6	4
F. Purvis	4	5
McRory	4	7
G. Purvis	3	7
Thomas	2	8
McCasill	3	7
Stralo	2	7

There is still several games to
play, although some of the rinks
have completed the schedule. Glen
Williams has one more game to
play and if he wins he will—has the
money says he will—has the
cup and medals in the bag.

You are cordially invited.

Local and General

Get your 1930 license plates at
the Crossfield post office.

Ray Gilchrist left on Saturday
to visit relatives at Maple Creek.

Mr. and Mrs. Ivor Lewis spent
Tuesday in Calgary.

T. Goldie and J. P. Winning
spent the week-end in the city.

Chas. Weber spent the week-
end in Calgary.

Paul Royer was a visitor in
Calgary on Saturday.

Items for this column are always
welcome.

Mrs. Syd Jones and Mrs. C. As-
mussen spent Tuesday in Calgary.

Happy McMillan, and Heavy
Williams spent the week end in
Calgary.

A sure sign of Spring—Simp-
son's family bibles have arrived
at the post office.

BORN—To Mr. and Mrs. A.
Crozier, on Sunday, January 26,
a son.

Will the party who borrowed a
long handled spade from L. B.
Thomas please return same.

Auto license plates can now be
secured from Mr. Mossop at the
post office.

Mr. Alex Webster and Mr. Mac-
donald Webster from Calgary
were visitors in town on Friday.

Mrs. Elliott of Airdrie was vis-
iting her brother Mr. G. T. Sef-
ton for the past week.

Mr. and Mrs. Chas. Stewart,
Mr. and Mrs. Pinkerton, Miss Hor-
ton of Carstairs were present at the
banquet on Friday night.

Mrs. (Auntie) Adderly, who has
been visiting Mr. and Mrs. Syd.
Jones for the past three weeks
left today (Thursday) for Calgary.

Dr. and Mrs. J. L. Zipperer of
Lougheed, were week-end visitors
at the home of Mr. and Mrs. A.
H. Miller.

A shower was given to Miss
Lydia Elhard, a coming bride at
the home of Mrs. J. Cavendar on
Friday afternoon last.

Mrs. Sterns of Calgary who
had been visiting her parents,
Mr. and Mrs. G. Gazeley, return-
ed to her home on Saturday.
Mrs. Gazeley accompanied her.

On Tuesday evening, January
20th, the Georgian Singers and
Players rendered an excellent pro-
gram in the Crossfield United
Church.

Mr. and Mrs. H. H. Gordon
spent last Thursday in Calgary.
Mr. Gordon attended the Massey
Harris tractor school during the
day.

The January meeting of the
Floral U.F.W.A. will be held at
home of Mrs. H. E. G. H. Schole
field on Thursday, February 11th,
at half past two.

Levi Bone of the Peace River
district was renewing acquaint-
ances in town last week end, Levi
has great praise for the North.

On account of the road and weath-
er, Mr. Young has not been get-
ting out to all his appointments,
but space does not permit us to
publish his sermon as requested.

The Sunshine U. F. A., junior
and senior, are holding a dance
at the school on Friday, February
7th. There will be good music.
Ladies please bring lunch.

Mr. and Mrs. R. M. McCool left
for Edmonton on Wednesday.
Mrs. McCool will spend a few
weeks with relatives there, whilst
Milt is in attendance at the session
on parliament hill.

The Women's Guild of the
Church of the Ascension will hold
their monthly meeting at the
home of Mrs. W. Major on Thurs-
day, February 6th. Will all mem-
bers please attend at 3.30 p.m.

The management of the Cal-
cadian Society are sorry that many
of their friends did not come to
banquet owing to a rumor that it
was an invitation affair. We hope
that they will come next year.
Look out for our ad, next January
and come along.

Local and General.

On Sunday evening at the Uni-
ted Church, children attending the
Sunday School were awarded
books for regular attendance.

The Misses Mary Ann Gazeley,
Frances McFadyen and Melya
Benedict of Crossfield, who are at-
tending Commercial High at Cal-
gary, were all successful in pass-
ing their mid-winter examinations.

It is to be hoped that our re-
tiring Mayor will be re-elected to
the Council. Jim has done excel-
lent work for the common good
and it is likely that he can be
persuaded to stand again.

February 2nd.—Church of the
Ascension — Sunday being the
Feast of the Purification of the
B.V.M. or Candlemass Day there
will be a celebration of the Holy
Communion at 9 a.m.

The Five Hundred Club met at
home of Mrs. J. Reeves on Wed-
nesday. Mrs. Wm. Pogue winning
first prize and Mrs. D. McFadyen
the consolation. A dainty luncheon
was served by the hostess.

When the 9.50 train arrived today,
Pete Blasken was in attendance to
meet George, our popular cafe man,
who was returning from Victoria,
where he was recently married. His
better half is to arrive on Satur-
day evening. Pete was dressed in
Highland costume, playing his ac-
cordion and driving the old grey
in a decorated cutter.

R. M. McCool, M. L. A. on
arriving home on Friday soon
convinced the Deputy Provincial
Secretary that it would be more
satisfactory to the ear owners of
this district to secure their car
licenses at the local post office
as here-to-fore, Mr. McCool soon
got results as the plates arrived
here the next day and are now on
sale at the post office.

The annual meeting of the Uni-
ted Church will be held in the
Church on Thursday of next week
when the election of officers, re-
ports of the various organizations
in connection with the church in-
terseperated with music items. Re-
freshments will afterwards be serv-
ed. A good attendance is desired.

On the morning Wednesday, Jan.
22nd, an Oakland Sedan was stuck
in the snow on the road, north end
of town. This car was evidently
abandoned some time during the
night. Constable Jarman investi-
gated and communicating with Cal-
gary found that the car had been
stolen early that morning from Mr.
Colter of the Noble Hotel, Calgary.
The car was hauled to the Service
Garage, where it was found that
the radiator was badly frozen. Mr.
Colter came up from Calgary on
Wednesday afternoon and drove
his car home.

An Excellent Entertainment

The concert consisted of various
vocal and instrumental numbers.
Miss Elliott's violin selection pos-
sesses a finish and artistry that
one does not expect from any but
the really great artists. Miss
Howarth, the accompanist, pre-
sented two very excellent piano-
forte solos. No lover of music
could fail to appreciate these se-
lections.

Mr. Chapman and Mr. Edmond-
son sang several duets which were
exceedingly well received. Mr.
Chapman, the possessor of a splen-
did tenor voice, sang several songs
which were a real treat. Many
of us, no doubt, have heard "The
Cornish Floral Dance" and "The
Big Bass Vol" but not in a more
accomplished manner than Mr.
Edmondson sang them.

An added feature was the run-
ning fire series of jokes and mo-
nologies by Mr. Edmondson.

The only fault one can find with
this concert was that the audi-
ence was not what it should have
been and it is certainly too bad
that a larger percentage of Cross-
field's population did not attend.

People will, after awhile cease to
work to bring concerts of this
quality to the Village when their
efforts meet with such a lack of
support.

Percy Griffiths of Crossfield Writes Canadian Prize Winning Article

Hundreds of Merchants and Clerks from All Parts of America
Participate in Contest—Reasons Given For Local Buying

Percy Griffiths of the U. F. A.
Store, Crossfield, was the Canadian
prize winner in the Plumb-Hard-
ware Retail Award the object of
which was "to determine the most
forceful reasons "why it is to the
best interests of the consumer to
buy from the efficient independent
retailer" rather than from other
sources of supply.

Mr. Griffiths won \$10 in cash and
a special prize of a hammer, for his
prize winning article. The prize
winning reasons submitted by Mr.
Griffiths are published herewith.

DEAR MR. BROWN:

You have been a respected member of
our community for quite a while.

As a business house in the same com-
munity we are always happy to attend to
your needs in the hardware line. We feel
that you have not called upon us as often
as we should have liked and attribute
that to a natural shyness on your part.

As a consequence you are probably un-
aware of which of your particular needs
we carry, so we take pleasure in pre-
sents to you a few facts concerning our
business and our methods. In dealing with
you:

1. We consider you yourself. We
give every customer our personal consid-
eration. To us you are Mr. Brown, not
merely order No. 23 or order No. 50.

2. Everything we sell you is handled
by us personally. We are not mere agents
We don't sell in the dark.

3. We guarantee what we sell. Occa-
sionally a fault occurs in some article
or other. In this event we adjust prompt-
ly. There is no red tape. The manager
is always accessible, and head office is
right here.

4. Our stock is not very large. Con-
sequently it is up-to-date. Quality goods
for quality customers is our motto.

5. You can always examine what you
buy. We don't force sales. We don't
ram a sale down your throat. Come in
and look around.

6. While our business is largely on a
cash basis, we give reliable people like
yourself a line of credit on big items, and
when we do that we don't pry into your
family history. That is your affair.

7. If you need some specialty not in
stock, we get it for you within twenty-
four hours.

8. The large department store that
undersells us in some lines, also under-
pays its help. We pay ours a living wage.
Live and let live.

9. Just as the pendulum of the clock
swings from starting point to finish, and
from finish back again to starting point,
so money spent with us is re-spent locally
to a large extent. When you buy from
us, you help build up your own com-
munity.

10. Our prices are prices delivered at
your own door.

Now is the time of the year to ad-
vertise for those stray horses and
cattle. A small ad in this paper
will help you.

"That old gentlemen says that
this is the first time he has used a
telephone in ten years," said a citi-
zen to a friend at Airdrie. "He must
live on a party line," was the reply.

The Family Herald & Weekly
Star and the Crossfield Chronicle
for one year for \$2.00.
